

## Core Node Creator SOP

### Our Goals

- With the Core Node Initverse partnership, the Initverse project is aimed to be more recognized in Turkey and meet many crypto enthusiasts.
- As Core Node, we aim to provide the community support we provide to many projects in the most efficient way for the Initverse project.
- One of our most important wishes is for our community with many active members to grow completely organically and have a sense of community, and for the interest in the Initverse project to grow completely naturally and organically and be recognized worldwide. In the light of the most accurate information about our country

### Our Expectations

- As the Core Node Team, we have important agreements with our teammates, especially on mainnet verification, and our negotiations with many projects continue. The main goal of our team is to run node installations and mainnet validators. We also provide support to projects on social media management. As a team and a community, you can be sure that we will support your project as best as we can throughout the collaboration.
- When collaboration takes place, the win-win method will always be beneficial for both parties. In this respect, we believe that we can have a very productive collaboration with the Initverse project.

### Our Future Plans

- We would like to share with you that our team has collaborated on many projects. We run mainnet validators on projects such as GOracle Network, Tangle, Router Protocol, Humanode, Muon, flock io, Pactus, and also help communities with roles such as community moderation and ambassadorship.
- In addition to Twitter, Telegram and Discord management, we plan to prepare a node installation video on our YouTube channel. In this way, we plan to publish the guides we wrote on Github as videos on our YouTube channel and work to integrate these publications into your platform.
- We plan to significantly increase the interaction rate of the Initverse project by publishing articles and social media posts on a monthly and weekly basis. With the curiosity and excitement of our community, we will take steps in the most regular and efficient way in this regard.
